Dear Sirs,

This letter serves as an official response to the Interlaboratory Comparisons performed by the University of New Hampshire InterOperability Laboratory (UNH-IOL) and ICSA Labs on SRM 1.0.

All discrepancies with the results were caused by differences in configuration files. UNH-IOL performed the testing using Quagga and did not use the kickstart file.

Alternatively, ICSA Labs used the kickstart file.

This difference in files has caused inconsistent results, however it has been verified that both test tools operated as expected and no changes to the test tools are necessary.

By: 
Erica Johnson
UNH-IOL Director
